

RANDY GAGE

Overcoming “Mind Viruses” is the Key to Prosperity

The economy is the news story of our time as Americans struggle with unemployment and a sluggish, jobless "recovery." Yet thousands of people have discovered they can break free from the drag of the economic black hole and create wealth, freedom and prosperity, simply by conquering self-imposed, self-defeating limitations.

This is the message that has resonated with audiences around the globe as preached by the wildly popular author and Prosperity Expert Randy Gage. With a style that's been described as "Deepak Chopra meets Dennis Miller," this prosperity provocateur prods people to ditch attitudes that are holding them back and grab opportunities previously hidden.

"Just like you get viruses on your computer, you get these viruses on your brain, in your subconscious mind, that money is bad, it's spiritual to be poor, rich people are evil," he says.

Through his "Prosperity TV" (www.youtube.com/randygage) and Success & Prosperity blog (www.RandyGage.com/blog), he skewers cultural icons from films like *Titanic* and *Avatar* to the Pope and organized religion for fueling popular attitudes that revere poverty and demonize wealth. Randy calls these "mind viruses" — subliminal messages that subconsciously sabotage our quest for prosperity.
